OBJECTIVE

Driven and dedicated Computer Information Systems graduate from Clemson University with hands-on experience building full-stack web applications, REST APIs, and relational databases. AWS Cloud Practitioner Certified with a Cybersecurity minor and a background in cloud deployment, backend development, and agile team collaboration. Looking to bring that foundation to an entry-level software or web development role and keep growing as a developer.

EDUCATION

BS in Computer Information Systems | Minor in Cybersecurity | Clemson University | Graduation Date: May 2026

- BS degree in Computer Information Systems in the Engineering, Computing & Applied Science college
- Minor in Cybersecurity
- GPA: 3.42/4.00

CERTIFICATIONS

- AWS Certified Cloud Practitioner | AWS | January 6, 2026
- JavaScript Certification | Simplilearn JavaScript for Beginners | February 20th 2025

SKILLS & ABILITIES

- **Programming Languages:** C, C++, Java, Python, JavaScript, HTML/CSS, SQL, JSON, YAML
- **AWS Applications:** Lambda, API Gateway, DynamoDB, CloudWatch, EC2, Route 53, Auto Scaling, Load Balancing, S3
- **Networking:** TCP/IP Sockets, Secure File Transfer, Distributed Systems
- **Security:** Network Intrusion Detection, DDoS Simulation, Buffer Overflow Analysis, DNS Attack Analysis, TCP/IP Attack Analysis, Race Condition Vulnerabilities,
- **Operating Systems & Systems:** Linux (Ubuntu), Bash/Shell Scripting, File System Management, Process Management, Virtual Memory, FAT12, GRUB
- **Database:** SQL, PostgreSQL, ERD Design, Relational Schema Design, Normalization, CRUD Application Development
- **Tools & Applications:** AI driven development, Cursor, Claude, Microsoft Office Applications, Makefiles, Git, GitHub, Postman, Azure DevOps, Docker, Flask, Node.js, Express, PostgreSQL, draw.io, Scapy, Wireshark
- **Technical Skills:** Debugging, System Troubleshooting, Computer Hardware, REST API Development, Agile/SDLC Methodologies, Systems Analysis & Design, UML Diagrams, UI/UX Prototyping
- **Mathematics:** Discrete Structures

PROJECTS

Battleship Radar Command | (Class Project – Clemson University) | Mar 2026 – May 2026

Technologies: Node.js, Express, PostgreSQL, NeonDB, JavaScript, HTML/CSS, Render

- Built and deployed a full-stack multiplayer Battleship game with a REST API backend, PostgreSQL database, and vanilla JS single-page frontend.
- Designed a 5-table schema (players, games, game_players, ships, moves) with raw SQL, handling turn rotation, ship placement, move validation, and player elimination.
- Implemented server-wide move validation and parameterized queries to prevent SQL injection, following a strict never-trust-the-client architecture.
- Built REST endpoints for player management, game creation, ship placement, firing, and move history retrieval.
- Deployed live on Render with NeonDB as the hosted PostgreSQL instance; used polling for real-time game state sync across clients.

Real-Time Network Intrusion Visualization & DDoS Simulation | Class Project – Clemson University | April 2026 – May 2026

Technologies: Python, Flask, Scapy, Leaflet.js, Linux, Ubuntu

- Built an open-source intrusion detection tool that monitors live network traffic and detects volumetric DDoS attacks in real time.
- Visualized geographic origins of attacking Ips on an interactive web map using Leaflet.js and GeoIP data.
- Deployed across two sandboxed Ubuntu VMs where one was the target/dashboard host, and the other as the attacker using a hping3 to simulate and validate detection.

Driver Incentive & Rewards Program | Full-Stack Web Application | Class Project – Clemson University | Aug 2025 – Dec 2025

Technologies: Django 5.2, Python, MySQL, JavaScript, Bootstrap, eBay Browse API, AWS EC2, Git/GitHub, Azure DevOps

- As a team we built a multi-role web application for managing driver incentive programs where sponsors award points to drivers for purchases. Implemented role-based access control, e-commerce, and administrative features.
- Key Features & Accomplishments:
 - E-Commerce & Catalog System - Integrated eBay Browse API for product search and import; built sponsor catalog management with shopping cart, wish lists, and order management with PDF receipt generation
 - Points & Rewards Management - Designed multi-sponsor points system with per-sponsor wallets, transaction logging, and configurable points-to-USD conversion
 - Security & Authentication - Implemented TOTP-based multi-factor authentication (MFA), password policies with lockout mechanisms, security questions, and comprehensive audit logging
 - User Management & Communication - Built role-based access control (Drivers, Sponsors, Admins), in-app messaging system, real-time chat rooms, and sponsorship request workflows
 - Reporting & Analytics - Created reporting system with CSV/PDF export for audit logs, sales reports by sponsor/driver, and invoice generation
 - DevOps & Deployment - Deployed to AWS EC2 with environment configuration, utilized Git/GitHub for version control, and implemented story tracking using DevOps practices

WORK EXPERIENCE

Charleston Water System | Charleston, SC

Corporate Trainer | June 2025 – August 2025

- Assisting the Corporate Trainer in coordinating and presenting specialized training in a variety of functional IT topics, such as corporate-level Microsoft [MS] software platforms. Office, Teams, One Drive, as well as additional platforms for financial management and customer service. Responsible for the effective presentation of training for all levels of associates.

Charleston Water System | Charleston, SC

IT Intern | May 2024 – August 2024

- Under direct supervision, assisted with maintaining computer systems and other technologies in a business setting. The duties included working with other IT Technicians to install hardware, troubleshoot computer issues and respond to IT questions from company associates.

Walmart-Distribution Center | Ridgeville, SC

Hauler/ Loader | May 2023 – August 2023

- Responsible for loading Walmart based trucks in an organized manner. Analytical and calculated thinking used to unload and load heavy boxes in a strategic way with the heaviest on the bottom and the lightest on the top.
