PROFILE

Recent Computer Information Systems graduate from Clemson University (GPA 3.42) with a Cybersecurity minor and AWS Cloud Practitioner certification. Experienced building full-stack web applications, REST APIs, and relational databases. Brings two summers of IT experience at Charleston Water System alongside project work in multiplayer web apps, network intrusion detection, and cloud-deployed applications.

EDUCATION & CERTIFICATIONS

- May 2026* **B.S. Computer Information Systems** — Clemson University
Minor in Cybersecurity | GPA: 3.42 / 4.00 | College of Engineering, Computing & Applied Sciences
- Jan 2026* **AWS Certified Cloud Practitioner**
- Feb 2025* **JavaScript Certification** — Simplilearn

EXPERIENCE

- Jun – Aug 2025* **Corporate Trainer**, Charleston Water System *Charleston, SC*
 - Co-facilitated IT training sessions covering Microsoft 365 (Office, Teams, OneDrive) and specialized financial and customer service platforms for employees at all levels.
 - Developed training content tailored to varying technical skill levels, improving software adoption across departments.
- May – Aug 2024* **IT Intern**, Charleston Water System *Charleston, SC*
 - Provided hands-on IT support across the organization — installing hardware, troubleshooting workstations, and resolving help desk tickets.
 - Collaborated with senior IT technicians on system maintenance, gaining practical exposure to enterprise infrastructure and business IT environments.
- May – Aug 2023* **Hauler / Loader**, Walmart Distribution Center *Ridgenville, SC*
 - Loaded 40+ outbound trucks per shift using systematic weight distribution, maintaining zero damage incidents across the summer.

PROJECTS

- Mar – May 2026* **Battleship Radar Command**
Node.js, Express, PostgreSQL, NeonDB, JavaScript, HTML/CSS, Render
 - Built and deployed a full-stack multiplayer Battleship game with a REST API backend, PostgreSQL database, and vanilla JS frontend; live on Render with NeonDB.
 - Designed a 5-table relational schema using raw SQL, handling turn rotation, ship placement, move validation, and player elimination; enforced parameterized queries to prevent SQL injection.
- Apr – May 2026* **Real-Time Network Intrusion Visualization & DDoS Simulation**
Python, Flask, Scapy, Leaflet.js, Linux, Ubuntu
 - Built an intrusion detection tool that monitors live network traffic and flags volumetric DDoS attacks in real time using Scapy packet inspection.

- Visualized geographic origins of attacking IPs on a Leaflet.js map; validated detection across two sandboxed Ubuntu VMs using hping3 to simulate attacks.

Aug – Dec 2025

Driver Incentive & Rewards Program

Django 5.2, Python, MySQL, JavaScript, Bootstrap, eBay Browse API, AWS EC2, Git/ GitHub, Azure DevOps

- Built a multi-role web app managing driver incentive programs with role-based access for Drivers, Sponsors, and Admins; integrated eBay Browse API for live product search and catalog import.
- Implemented TOTP-based MFA, password lockout, audit logging, and a reporting module with CSV/PDF export; deployed to AWS EC2.

SKILLS

<i>Languages</i>	Python, JavaScript, Java, C, C++, HTML/CSS, SQL, JSON, YAML
<i>Cloud & AWS</i>	EC2, Lambda, API Gateway, DynamoDB, CloudWatch, S3, Route 53, Auto Scaling, Load Balancing
<i>Databases</i>	PostgreSQL, MySQL, ERD Design, Schema Design, Normalization, CRUD Development
<i>Security & Networking</i>	Intrusion Detection, DDoS Simulation, Buffer Overflow, DNS/TCP-IP Attacks, MFA/TOTP, Scapy, Wireshark, TCP/IP Sockets
<i>Frameworks & Tools</i>	Node.js, Express, Django, Flask, Git/GitHub, Docker, Postman, Azure DevOps, Linux/Bash, REST APIs, Agile/SDLC
